Chippenham & District Metal Detecting Club (CDMDC) Newsletter

HELEN FOX The CDMDC would like to thank Helen for all the time and effort she has given the club since the day she became a member back in Feb 2019. At the beginning of April she is moving to Koroni in Greece

13thC Koroni Castle

The town of Koroni was founded in ancient times. The 2nd century Greek geographer Pausanias reported that the original location of Koroni was at modern Petalidi, a town a few kilometers north of Koroni. He also reports many temples of Greek gods and a copper statue of Zeus. In the 6th and 7th centuries AD, the Byzantines built a fortress there.

Affiliated Regions for Metal Detecting (ARMD)

The Western Region covers the area of Gloucester, Wiltshire, Avon and Somerset, South Wales, Dorset, Devon and Cornwall. This region is made up of clubs, and many individual members from other areas.

Andrew John Harrison (right) became a committee member for the Western Region this month. Good luck in your new role Andrew.

Andrew is wearing the new low key CDMDC fleece.....only joking.

CDMDC BEST FINDS OF 2023 Congratulations to Simon & Matt
who's finds were voted the best for 2023
